

## The ℑℒℒℒℒℒℒℒℒℒ Extension

The ℑℒℒℒℒℒℒℒℒℒ extension is an addition to FOP that can be used to draw ℒℒℒℒℒ expressions.

### Examples

This is a 12pt block with a formula :

$$\int_0^{+\infty} e^{-x^2} dx = \frac{\sqrt{\pi}}{2}$$

But you can prefer a red block with a font set to 15pt:

$$\det \begin{bmatrix} \alpha & \beta \\ \gamma & \delta \end{bmatrix} + 3 \stackrel{\text{def}}{=} \alpha \times \delta - \gamma \times \beta$$

An other one:

$$\phi_n(\kappa) = \frac{1}{4\pi^2\kappa^2} \int_0^\infty \frac{\sin(\kappa R)}{\kappa R} \frac{\partial}{\partial R} \left[ R^2 \frac{\partial D_n(R)}{\partial R} \right] dR$$

Another formula with a \mathfrak :

$$\det \begin{bmatrix} a_{11} & a_{12} & \cdots & a_{1n} \\ a_{21} & \ddots & & \vdots \\ \vdots & & \ddots & \vdots \\ a_{n1} & \cdots & \cdots & a_{nn} \end{bmatrix} \stackrel{\text{def}}{=} \sum_{\sigma \in \mathfrak{S}_n} \varepsilon(\sigma) \prod_{k=1}^n a_{k\sigma(k)}$$

But you can prefer a formula in the text  $\sum_{n=1}^{+\infty} \frac{1}{n^2} = \frac{\pi^2}{6}$  in \displaystyle or in \textstyle  $\sum_{n=1}^{+\infty} \frac{1}{n^2} = \frac{\pi^2}{6}$

$$A_1 = N_0(\lambda; \Omega') - \phi(\lambda; \Omega'),$$

$$A_2 = \phi(\lambda; \Omega') - \phi(\lambda; \Omega),$$

and

$$A_3 = \mathcal{N}(\lambda; \omega).$$

$$X = a + b + c + d + e + f + g$$

$$+ h + i + j + k + l + m + n + o$$

$$p + q + r + s + t + u + v + w + x + y + z$$
